Project Development Phase
Model Performance Test

Date	20-10-2023
Team ID	E58463ADFC36283A5274716DB239CCF2
Project Name	Project – Analytics Tool For Placement
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Dashboard design	No of Visualizations / Graphs - 5
2.	Data Responsiveness	Evaluate the tool's ability to respond promptly to user queries and interactions. Simulate user interactions with varying data loads to assess responsiveness.
3.	Amount Data to Rendered (DB2 Metrics)	valuate the tool's efficiency in handling and rendering large datasets. Use progressively larger datasets to assess the tool's rendering capabilities. Load a small dataset (e.g., 100 records) and assess rendering speed. Verify that all data is correctly displayed.
4.	Utilization of Data Filters	Test how effectively the tool processes and utilizes data filters for user-specific queries. Apply a range of data filters to observe the tool's responsiveness and data accuracy.
5.	Effective User Story	No of Scene Added - 4
6.	Descriptive Reports	No of Visulizations / Graphs - 5
